DATE OF INFO

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION 25X1

1. [redacted] In the 39th and 57th Gds Rifle Div, officers received no CW training. EM received about five to six hours of CW lectures during each year and gas mask training for one-half hour weekly. The gas mask issued to soldiers was the type shown on page 42. Dept of the Army pamphlet #30-2. [redacted] 25X1
- [redacted] it was never tested in combat, but according to instructional theory, it was good for eight hours of continuous protection against respiratory gases. The actual time necessary to put on the gas mask varied from 10 seconds up to one minute, depending upon the individual soldier. [redacted] 25X1
- [redacted] 25X1
2. Dugouts located about one kilometer away from the barracks at Eisenach were used as gas chambers. Once each year all EM (no officers) went through the gas chamber with their mask on. [redacted] 25X1
- [redacted] 25X1

bombs, shells, sprays or candles. The 932nd and 935th Sep AAA Bns had about 20 smoke pots which were used for training demonstrations by the chemical instructor. In 1940

the Soviets had tear gases, mustard, lewisite, chloropicrin, and diphosgene:

3. never saw any shells, bombs, disseminating devices for aircraft or decontamination equipment. None of the above chemical equipment was stored on or near my caserne. The following CW equipment was in stock in the 932nd and 935th Sep AAA Bns:

- (1) Chemically treated gloves - one pair for each man
- (2) Chemically treated overshoes - one pair for each man
- (3) Cellophane capes - two for each mask (each soldier was issued a mask)
- (4) Three suits of rubberized-protective clothing for training.

6.

7. In 1944, the Soviets developed a special shell called "Pod Kalibernyi Snaryad" (sub caliber projectile) for the 57 and 76-mm AT, 76 and 122-mm Field and the 85-mm AA and AT guns which proved to be very effective in armor piercing. It was a fixed shell, the same size as the standard projectile, but had a different nose. pictures the shell as follows:

25X1

It pierced the armor of German Tiger tanks at ranges of 300 - 600 m. this projectile will penetrate 20 cm of armor at ranges of 1000 - 1200 m.
